

dTIMS™ Management Dashboard

Making informed decisions can be simple

Simplify your infrastructure asset management

As a manager you need to make difficult decisions about budget, work programs and future projects. With Deighton's management dashboard, you have the information you need to make those decisions. And it's all right there in your web browser.

dTIMS md gives you easy access to the wealth of information you already trust and rely on in dTIMS CT. Suddenly managing your infrastructure network becomes simple, thanks to a tool that's simple to use, simple to set up, and is simply the best way to get detailed information that's easy to understand.

Complex decisions don't have to complicate your life

Managing your assets can be complicated. You're always looking ahead, trying to make the best choices — Should we expand our network? Will we need to resurface our main transportation arteries next year? How much do we need for this winter's road maintenance budget? These aren't easy questions, but getting the information you need to make informed, intelligent decisions is easy with dTIMS md.

dTIMS md is your gateway to the extensive resources available in dTIMS CT. Quickly get accurate data to help you make the right choices for your organization — for example, view the impact of proposed policy or budget changes, simulate the evolution of your network over time, analyze work program recommendations, and create up-to-date management reports.

And you don't have to wade through dense reports to find the information you need. Visual maps, clear charts and concise reports provide you with usable, comprehensive data to support your decisions.

It's as easy as using your web browser

dTIMS md is ready to use with your dTIMS CT system — no customization required. And it's so straightforward, you'll be ready to start using it almost immediately.

With just your web browser, you'll quickly find the information you need, including rich map-based reports that help you see the impacts of your decisions immediately. And since dTIMS md works securely over the Internet, a detailed analysis of your infrastructure asset network is available to you anytime, anywhere.

Key Benefits:

Easy Access to Powerful Information

- Simplify tough decisions using clear, detailed analysis from dTIMS CT
- Access strategic information anytime, anywhere
- Easily share valuable, readable reports within your organization

Low Implementation Cost

- Use your existing web browser
- Get satellite map-based reports without expensive GIS server software
- Learn to use dTIMS md in less than an hour

Facing tough questions about your infrastructure network? You need accurate, reliable information to make the best decisions. dTIMS md gets you that information quickly and easily. And with the power of dTIMS CT behind you, you know you're getting results you can rely on.

KEY FEATURES

Secure Login

Control access to your system with secure user ID and password combinations. Assign access to both individuals and groups.

Map-Based Translation

Translate engineering information into spatially-related imagery using your own base maps and free Internet satellite overlays from Google™, Yahoo™ and Microsoft Virtual Earth™.

Use map reports to visually review your analysis results, time-based network changes, and the impact of budget changes on your asset network.

Work Programs

View recommended work programs from dTIMS CT and sort them by section or year. Create a report detailing program recommendations, allowing you to distribute the results or perform further analysis.

Datasheet Views

View and interact with any asset attribute stored in dTIMS CT. Modify individual asset attributes and map them using your own symbology.

Budget Scenarios

View budget scenarios created in dTIMS CT. Choose user-defined budget projections online and view the optimization based on your selection.

Summary Charts

Analyze budget scenarios using a variety of charts:

- Average Network Condition
- Program Cost
- Backlog
- Condition Distribution
- Treatment Cost
- Return on Investment

Temporal Network Mapping

Simulate the results of a variety of budget scenarios to see how your asset network changes over time.

Custom Reports

Create your own customized reports and even link to reports from other web services.

Executive Reports

Produce up-to-date management reports at any time, right when you need them.

dTIMS md Temporal Network Mapping - View the evolution of your network over time.
